

Ghostly Shadow-Puppet Fun

Cut out ghost puppets using the templates here, or from designs of your own. Affix the puppets to sticks or pencils. Then shine a flashlight on a wall or a white sheet strung on a clothesline. Hold the puppets between the light and the sheet or wall. Experiment with eerie effects by bringing your puppets closer or farther from the light. Make up spooky stories for them too. You can add brass fasteners to joints to make your shadow puppets move.
